

Functional Requirements Document (FRD)

Project Name: Rahul Pharma Government Tender Analytics Dashboard

The purpose of this document is to define the functional requirements of the Rahul Pharma Government Tender Analytics Dashboard.

The dashboard will help management monitor tender performance, revenue, inventory, supplier performance, delivery operations, and payment collection.

1. Dashboard Modules

a. Module 1: Executive Dashboard

Purpose

Provide a summary view of overall business performance.

Functional Requirements

FR-01.1

System shall display Total Revenue KPI.

FR-01.2

System shall display Total Profit KPI.

FR-01.3

System shall display Total Tenders KPI.

FR-01.4

System shall display Tender Win Rate KPI.

FR-01.5

System shall display Pending Payment Amount KPI.

FR-01.6

System shall display Delivery SLA Percentage KPI.

FR-01.7

System shall display Revenue Trend by Month.

FR-01.8

System shall display Tender Status (Won, Lost, Pending).

2. Module : Tender Analytics Dashboard

Purpose

Monitor tender performance and profitability.

Functional Requirements

FR-02.1

System shall display State-wise Tender Revenue.

Business Question:

Which state gives highest revenue?

FR-02.2

System shall display Competitor Win Analysis.

Business Question:

Which competitor wins most tenders?

FR-02.3

System shall display Tender Category Profitability.

Business Question:

Which tender category is most profitable?

FR-02.4

User shall be able to filter data by State.

FR-02.5

User shall be able to filter data by Tender Category.

FR-02.6

User shall be able to filter data by Date.

3. Module 3: Operations Dashboard

Purpose

Monitor inventory, supplier performance, and payment collection.

Functional Requirements

FR-03.1

System shall display Supplier Performance Analysis.

Business Question:

Which suppliers cause delays?

FR-03.2

System shall display Hospital Outstanding Amount.

Business Question:
Which hospitals delay payments?

FR-03.3
System shall display Inventory Risk Analysis.

Business Questions:

- * Which medicines expire frequently?
- * Which medicines need reorder?

FR-03.4
System shall display Expiring Medicines Count KPI.

FR-03.5
System shall display Supplier Delay Count KPI.

FR-03.6
System shall display Inventory Value KPI.

FR-03.7
System shall display Pending Payment Amount KPI.

4. Common Filters

FR-04.1
User shall be able to filter dashboard by Date.

FR-04.2
User shall be able to filter dashboard by State.

FR-04.3
User shall be able to filter dashboard by Supplier.

FR-04.4
User shall be able to filter dashboard by Tender Category.

5. Data Sources

- Tender_Master
- Sales_Fact
- Supplier_Master
- Medicine_Inventory
- Delivery_Tracking

- Payment_Tracking
- Competitor_Bids
- Quality_Inspection
- Compliance_Audit
- Approval_Tracking

6. Expected Output

The dashboard shall provide a centralized view of tender performance, revenue, inventory, supplier performance, and payment collection.

The dashboard shall help management identify operational issues and support business decision-making.
