

Business Requirements Document (BRD)

Project Name: Rahul Pharma Distributor's Government Tender Analytics Dashboard

1. Project Background

Rahul Pharma supplies medicines to government hospitals through state and central government tenders.

The company faces challenges such as tender rejection, delivery delays, inventory issues, supplier performance issues, and pending payments.

Currently, business information is stored in multiple files and there is no centralized reporting system.

2. Current Process

Rahul Pharma is a pharmaceutical distributor supplying medicines to retail pharmacies, hospitals, and healthcare institutions. The company currently operates in the Mumbai Metropolitan Region and Pune, Karad region through its existing distribution network.

The company is now expanding its business by participating in state and central government medicine tenders across India.

Tender-related activities such as tender tracking, inventory monitoring, supplier management, delivery tracking, and payment tracking are currently managed through multiple Excel files and manual processes.

3. Business Problem

Data is maintained in multiple Excel files by different departments. The management team does not have a single view of business performance.

Main problems:

- Tender rejection causes revenue loss.
- Delivery delays affect customer satisfaction.
- Medicine expiry causes inventory loss.
- Pending payments affect cash flow.
- Supplier issues affect operations.
- Compliance issues increase business risk.

This makes decision-making difficult.

4. Project Objective

The objective of this project is to create reports and dashboards that help management monitor business performance and make better decisions.

The dashboard should help:

- Track tender performance.
- Monitor inventory levels.
- Track supplier performance.
- Monitor delivery performance.
- Track pending payments.

- Monitor compliance and audit issues.

5. Project Scope

Included in Scope:

- Tender Analysis
- Inventory Analysis
- Supplier Analysis
- Delivery Analysis
- Payment Analysis
- Compliance Analysis

Out of Scope:

- Accounting system
- ERP implementation
- Online tender submission
- Purchase order creation

6. Stakeholders

Stakeholder	Responsibility
Managing Director	Business decisions
Tender Team	Tender management
Finance Team	Payment tracking
Warehouse Team	Inventory management
Procurement Team	Supplier management
Logistics Team	Delivery management
Compliance Team	Audit and compliance monitoring

7. Business Requirements

BR 01: System should display total tenders by status (Won, Lost, Pending).

BR 02: System should display tender win rate by state.

BR 03: System should display supplier rating and delay count.

BR 04: System should display delayed deliveries and average delay days.

BR 05: System should display current inventory stock levels and reorder alerts.

BR 06: System should display medicines nearing expiry.

BR 07: System should display pending payment amount by hospital.

BR 08: System should display compliance issues by risk level.

8. Key Performance Indicators (KPIs)

The following KPIs will be used to measure business performance.

KPI	Description
Total Tenders	Total number of tenders participated in by Rahul Pharma
Tender Win rate	Percentage of tenders won compared to total tenders applied
Total Revenue	Total sales value generated from tenders
Delivery SLA %	Percentage of orders delivered on or before the expected date
Pending Payment Amount	Total payment amount yet to be received from customers
Expiring Medicine count	Number of medicines approaching expiry
Supplier Delay count	Number of delayed deliveries caused by suppliers
Compliance issue count	Total compliance or audit issues identified
Inventory Value	Total value of medicines available in inventory
Average Delivery Delay	Average number of days delayed for deliveries

9. Success Measures

- Improved visibility of tender performance.
- Faster identification of delivery issues.
- Better inventory monitoring.
- Improved supplier evaluation.
- Better payment tracking.
- Improved business reporting.

10. Assumptions

- Data is available and accurate.
- All departments provide required data.
- Users have access to dashboard reports.

11. Risks

Risk	Impact
Incorrect Data	Wrong Analysis
Missing Data	Incomplete reporting
Delivery Delays	Customer Dissatisfaction
Compliance issues	Tender Rejection
Supplier issues	Operational Dealy
Inventory Shortage	Order Fulfilment Issues

12. Expected Outcome

A centralized reporting solution that helps Rahul Pharma monitor tender operations, inventory, suppliers, logistics, payments, and compliance activities.
